Table of contents

Abstracts of Papers and Posters (sorted by first author)

Biological control of bacterial diseases of plants in Nigeria: problems and prospects
  N. A. Amusa
  20

Biological control of bacterial pathogens on tomato plants
  Balestra, G.M. and A. Quattrucci
  20

Biocontrol agents and their potential risk for human health
  Gabriele Berg
  21

Characterisation of an inhibitory strain of Pseudomonas syringae pv. syringae with potential as a
biocontrol agent for bacterial blight on soybean
  Sascha D. Braun and Beate Völksch
  21

Principles in biological control: colonization, antagonism, plant growth promotion and induced
resistance
  H. Buchenauer
  22

Identification of genetic mechanisms that affect Agrobacterium vitis-plant interactions including
biological control
  Thomas J. Burr, Guixia Hao and Jodi Creasap
  23

Factors affecting efficiency of biological control of fire blight in Pseudomonas fluorescens
EPS62e
  Cabrefiga, J.; Bonaterra, A.; Montesinos, E.
  24

Application of non-pathogenic Agrobacterium radiobacter for preventing crown gall disease in
dicots, growth-promotion in monocots and molecular aspects of agrobacterial attachment to plant
  Chumakov, M.I.
  24

cell surfaces

Mode of action and genes involved in biological control of grape crown gall by Agrobacterium
  vitis strain F2/S
  Jodi E. Creasap, Guixia Hao, Hongsheng Zhang, Simone Zäuner, Cornelia I. Ullrich, and Thomas
  J. Burr
  25

Suppression of bacterial blight on rice by induced resistance and manipulation of endogenous
  abscissic acid levels
  David Devleeschauwer, Kris Audenaert and Monica Höfte
  26

Bacillus subtilis strain QST 713, bacterial disease control in fruit, vegetable and ornamental
production
  D. W. Edgecomb and D. Manker
  26

Production of hydrogen cyanide (HCN) and lytic enzymes by rhizobacteria isolated from
different plants and soils
  Egamberdieva, D.
  27

Biological Control of Fire Blight Disease in Egypt, (I) Usage of Different Strains of Bacteria
  M. K. Abo El-Dahab, A.A. Shoich and S. A. El-Kazzaz, A. K. Mohamed
  28

Biological Control of Fire Blight Disease in Egypt, (II) in Comparison with Chemical Control
  M. K. Abo El-Dahab, A.A. Shoich and S. A. El-Kazzaz, A. K. Mohamed
  28

Biological control of bacterial canker of tomato (Clavibacter michiganensis subsp.
michiganensis)
  M'Barek Fatmi
  28
Characterization of epiphytic bacteria from Australia and Europe as possible fire blight antagonists
K. Gelder, V. Jakovljevic, M. Mohammadi and S. Jock

Bacterial inoculants for the suppression of rice bacterial blight in India: role of 2,4 diacetyl phloroglucinol in disease suppression
S. S. Gnanamani, K. Kamalanalini, S.P. and Lalithakumari, J.

Bacterial disease of birch in forests of Russia
U.I. Guinekenko, A.M. Zhukov

A novel bacterium for biocontrol of broad spectrum of pathogens
Gomathiyanagam, S., Kamalanalini, S.P. and Lalithakumari, J.

Sensibility of isolates of Acidovorax avenae subsp. avenae and Xanthomonas campestris pv. vasculorum against a bacteriocin
Manuel Filoiet Guerra

In vitro inhibition of growth of Erwinia amylovora by plant oils
Hevesi, M., Boja, N., Bánáty, R., Babulka, P., Tóth, M.

Biosafety regulations in Germany
P. Hoffmann

Potential use of essential oils for plant bacterial disease control
Nicola Sante Iacobellis and Pietro Lo Cantore

Management of bacterial spot on tomatoes with bacteriophages

Basal resistance of plants to bacterial infection as a possible means for biological control
Klement, Z., Ott, P.G., Szatmári, A., Besenyel, E., Czelleleng, A., Szabó, E. and Bozsó, Z.

Effects of different drying techniques on the inhibitory effect of Pantoea agglomerans strain Eh24 bioformulation
T.A. Koltuksuz, E. Aslan, H. Özak Thornton, T. Bora, F.V. Sukhan

Fire blight control in organic fruit growing - Systematic investigation of the mode of action of potential control agents
Kunz, S.

Biological control of plant diseases by application of natural, epiphytic living non-pathogenic antagonists to the plant phyllosphere
Kürkçeoglu, Sophia; Piotrowski, Markus; Degenhardt, Juliana; Al-Masri, Abdul Nasser; Gau, Achim E.

Antagonistic activity of the Bacillus strains against the phytopathogenic Erwinia
S.V. Lapa, O.N. Reva

Mode of action of the bacterial antagonist Rahnella aquatilis against Erwinia amylovora
P. Laux, W. Zeller

Control of the fire blight pathogen with bacteriophages
S.M. Lehman, W.-S. Kim, E. Barszcz, K. Schneider, A.J. Castle and A.M. Svircev

Biological control of grape crown gall in China with non-tumorigenic Agrobacterium vitis E26: possible mechanisms involved
Jinjun Li, Fan Chen, Yanbing Guo, Jianhui Wang and Huimin Wang

Strategies for biological control of soilborne pathogenic bacteria and practical efficacy of different methods
Maria M. López and Ramón Penalver
State of art of the biological control of bacterial fruit blotch of melon in Penambuco
Rosa L.R. Mariano; Elineide R. Silveira; Flavio H. V. Medeiros; Aldenir Oliveira; Elizama R. Santos; Ester R. Gouveia; Ana M. Souto-Maior

Fighting *Ralstonia solanacearum* in Brazil
Martins, O. M.; Lopes, C. A.; Quezado Duval, A.

Integrated management of bacterial wilt on field-grown tomatoes
M.T. Momol, P. Ji, S.M. Olson, and J.B. Jones

Integrated management of tomato bacterial spot in Florida
A. Obradovic, J. B. Jones, M. T. Momol, S. M. Olson, B. Balogh, and L. E. Jackson

A study on the biological control potentials of fluorescent pseudomonad strains against bacterial blotch disease (*Pseudomonas tolaasii*) of cultivated mushroom
Hatice Özkaktan, Tayyar Bora, Emek Aslan, Ahmet Uslu

Molecular markers of basal resistance, an inducible defense mechanism of plants against bacteria

Monitoring the biocontrol agent *Pseudomonas fluorescens* EPS62e by means of Real-Time PCR
Pujoj, M.; Badosa, E.; Manseau, C. and Montesinos, E.

Chemistry of apple and pear stigma exudates related to bacterial antagonism toward *Erwinia amylovora*
P.L. Pusey

A new natural anti-microbial product for use as an agricultural bactericide and fungicide
Willem Ravensberg

Screening biocontrol agents for control of seed-borne bacterial pathogens of carrots and brassicas
Roberts, S.J., Koch, E., Schmitt, A., Amein, T., Wright, S.

Tomato polygalacturonase inhibiting protein (PGIP) is not induced by the pathogen but increased with ageing
Ali Salehzadeh, Bahram Tafaghodinia, Mostafa Motallebi and Mohammad Reza Zamani

Risk assessment when working with biological agents
Klaus P. Schaal

Antagonistic activity of different yeast spp. against *Erwinia amylovora*
Seibold, A., Giesen, N. and Jelkmann, W.

Biocontrol and plant growth promoting potential of *Pseudomonas* sp. MML2212 from the rice rhizosphere
V. Shanmugaiah, S. Ramesh, M. Jayaprakashvel and N. Mathivanan

Optimized mixtures of biological control agents for suppression of fire blight
Virginia O. Stockwell

Sensitivity to biological control of *Agrobacterium vitis* is related to its pTi
S. Sühle, E. Szegedi, O. Kovács, E. Novákand, T.J. Burr

Status of research on biological control of tomato and groundnut bacterial wilt in Vietnam
Dean Thi Than	

Molecular biology of plant-associated bacteria involved in biocontrol
Matthias Ulrich

Biocontrol of bacterial canker disease of tomato using *Pseudomonas fluorescens*
S. Umesh

Antibiotics produced by strains of *Pantoea agglomerans*, biocontrol agents of fire blight
Sandra A. I. Wright and Steven V. Beer
Biological control of black rot of vegetable brassicas, caused by *Xanthomonas campestris* pv. *campestris*, with endophytic *Bacillus* strains

Wulf, E.G., Massono, S.M.S., Mugni, C.M., Mortensen, C.N., and Hockenhull, J.

Phenotypic and molecular characterization of the interaction of antagonistic bacteria with *Ralstonia solanacearum*, causing tomato bacterial wilt

Kerstin Wydra and Jörg Semrau

**Poster Presentations**

Studies on induced resistance against fire blight (*Erwinia amylovora*) with different bioagents

Abo-Elyour, K., Zeller, W., Yegor, O.

Evaluation of the diversity of *Erwinia amylovora* in Bulgaria

I. Atanasova, Z. Urshev, J. Dimitrov, N. Bogatzevska, P. Kabadjova, P. Moncheva

Biocontrol of phytopathogenic bacteria by using organic compost

Balestra, G.M., Di Mattia, E. and Manganu, M.

Control of Asiatic Citrus Canker and Citrus Bacterial Spot with bacteriophages in Florida

An early oxidative burst in apple rootstocks treated with DL-β-Amino butyric acid (BABA) against *Erwinia amylovora*

Ö. Baysal, Ş. B. Gölükçü, A. Ünlü and W. Zeller

Induction of oxidative burst in tomato leaves treated with unsaturated fatty acids of turtle oil (*Caretta caretta*) against *Pseudomonas syringae* pv. *tomato*

Antibacterial activities of essential oils from medicinal plants against the growth of *Clavibacter michiganensis* subsp. *michiganensis*

Soner Soyul, Emine Mine Soyul, Ömür Baysal and W. Zeller

An early oxidative burst in apple rootstocks treated with DL-β-Amino butyric acid (BABA) against *Erwinia amylovora*

Ö. Baysal, Ş. B. Gölükçü, A. Ünlü and W. Zeller

Biological control agents as tools against some emerging bacterial plant diseases in Italy: a concrete perspective?

Biondi, E., F. Bini, P. Lancioni, A. Brunelli, C. Bazzi

*Pantoea agglomerans* strain HIP32: A potential new antagonist of *Erwinia amylovora*

Babán, T., Lakatos, T., Tóth, T., Dorgai, L., Hudák, I., and Hevesi, M.

Experimental results on biological control of bacterial plant diseases in Venezuela

Nancy Contreras

Biological control to protect watermelon blossoms and seeds from infection by *Acidovorax* ssp. *citrulli*

Fessehaie, A. and Walcott, R.R.

Field experiments for fire blight control by artificial and non-artificial infection of apple trees in 2005

Fried, A., Seibold, A., Moltmann, E. and Jelkmann, W.

Multiplication and spread of the avirulent strain NCPPB 3123 of *Clavibacter michiganensis* ssp. *michiganensis* (proposed resistance inducer) alone and concomitantly with a virulent strain in tomato plants

Ftayeh, R., Rudolph, K.

Antagonistic coccus type bacteria causing death of a coryneform type of bacteria, the pathogen of *Agave tequilana* Weber var. *Azul*

L. Fucikovsky

Characterization of epiphytic bacteria originated from quince and medlar trees and its antagonistic effect against *Erwinia amylovora* *in vitro*

Gavrilović, V., Milijašević, S. and Živković, S.

Thyme essential oil as a natural plant extract for fire blight control

N. Hassanzadeh

Fire blight control by application of fungal antagonists

Heissenberger, B., Schaaffer, J., Loncaric, I., Moosbeckhofer, R.

*In vitro*-studies on fire blight control by bacterial antagonists

Heissenberger, B., Spornberger, A., Keck, M., Loncaric, I., Foilly, H.

Evaluation of a bacteriocin-producing attenuated strain (opgH-) of *Xanthomonas perforans* to control *Xanthomonas euvesicatoria*

Aaron F. Hert, M. Timur Momol, Gerald V. Minsavage, and Jeffrey B. Jones

Possibility for biological control of pectinolytic erwinias in hyacinth using antagonistic bacterial isolates

S. Jafra, J. Przysowa, J. van Doorn and J. M. van der Wolf

Effectiveness of essential oils against *Xanthomonas hortorum* pv. *pelargonii*, the causal agent of bacterial blight on geraniums

Kokošková, Blanka, and Pavela, Roman

Effectiveness of essential oils against pectinolytic erwinias and pseudomonads

Kokošková, Blanka, Pavela, Roman

Evaluation of epiphytic bacteria for potential control of the fire blight pathogen

Josef Korba, Jana Sillerová

Microbial preparations of complex action on plants

Resistance to *Erwinia carotovora* introduced to *Solanum tuberosum* from wild *Solanum* species

R. Lebecka, B. Fils and E. Żmiench-Guzowska

Using bacteriophages to prevent fire blight in the orchard

S. M. Lehman, W.-S. Kim, A. J. Castle, A. M. Svircev

Biological control of potato bacterial wilt caused by *Ralstonia solanacearum* in Ethiopia: I. determination of biovars of *Ralstonia solanacearum* from Ethiopia

F. Lemessa and W. Zeller

Antibacterial activity of plant extracts against bacterial plant pathogens

E. Lojkowska, A. Krolieka, E. Biskup

Dispersal of the biocontrol agent *Aureobasidium pullulans* for fire blight control using honeybees (*Apis mellifera carnica*)

Loncaric, I., Heissenberger, B., Moosbeckhofer, R.*

Biophotonic technology for inactivation of tomato pathogen *Clavibacter michiganensis* subsp. *michiganensis*

Z. Łuksiene, M. Vasinauskiene, D. Burokiene

Bactericidal activity *in vitro* of essential oils of *Hypois suaveolens* (L.) Poit and *Coleus amboinicus* (Lour)

Control of bacterial speck and bacterial spot of tomato using alternative strategies under greenhouse conditions
Svetlana Milijašević and Aleksa Obradovic

In vitro and in vivo evaluation of Streptomyces griseoviride strains on pathogenic bacteria of some crops in Costa Rica
Obregon, M.

Efficacy of different control strategies for preventing crown gall in the nurseries
A. Raio, R. Peluso, G. Puopolo, A. Zolna

Rhizobacteria-mediated induced systemic resistance against various plant pathogens and its mechanisms of action
Kyungsok Park, Ming-Shu Zeng, Yong-Chull Jeun and Ki-Woong Nam

Biocontrol potential of a growth promoting soil bacterium against phytopathogenic fungi
S. Prashanth, V.R. Prabavathy, K. Malarvizhi, K. Srinivasan and N. Mathivanan

Identification of resistance donors for fire blight in Malus
K. Richter, A. Pell, M. Höfer and C. Fischer

A biocontrol agent for bacterial blight that induces systemic resistance as it restrains pathogen multiplication in bean leaf tissue
Romeiro, R.S.; Vieira Júnior, J.R.; Ferraz, H.G.M.; Barra, V.R.S. and Melo, I.S.

Engineering of transgenic apple cultivars by expression of human lactoferrin to study effects on Erwinia amylovora
B. Schneider, C. Berwarth, V. Hanke and W. Jelkmann

Control of fire blight (Erwinia amylovora) using epiphytic bacteria with known activity against postharvest diseases of apples
Piotr Sobieczewski, Stanislaw Berczyński, Hanna Bryk

Antibacterial activities of essential oils from medicinal plants against the growth of Clavibacter michiganensis subsp. michiganensis
Soner Soylu, Emin Mine Soylu, Ömür Baysal and W. Zeller

Reduction of Crown gall incidence on stone fruits with some antagonistic bacteria
A.E. Tawfik, M.S. Mikhail, F.M. Barakat, and Rabab M. Abd-el-Aziz

Characterisation of an inhibitory strain of Pantoea sp. with potential as a biocontrol agent for bacterial plant pathogens
Beate Völksch

BACTOFRACT – Development of a biological pesticide against fire blight

Influence of siderophore production on biological control among Pseudomonas syringae strains
Annette Wensing, Helge Weingart and Matthias Ulrich

A comparison of two years of research on biological control of fire blight in New York
Werner, Nicole A. and Herb S. Aldwinckle

Recent status of the biocontrol of fire blight in Germany
W. Zeller

List of Authors
